

I-GRAM

Army Dams & Transportation Infrastructure Program

Vol 11 18-Feb-22

HQ IMCOM started centrally funding a CONUS Safety Inspection of In-Service Bridges training program for garrison DPW staff in 1993.

Training concentrates on:

- 1) Duties and responsibilities of a garrison bridge safety officer/ ADTIP manager.
- 2) Identifying, evaluating, and documenting the various bridge components and deficiencies,
- 3) Bridge design characteristics and inspection methods for common concrete, steel, and timber structures,
- 4) Identifying and evaluating various culverts and waterway deficiencies,
- 5) Determining bridge Installation Status Report, and
- 6) Requirements for civilian load capacity and Military Load Classification.
