

Instructions for updating the Vehicles database

1. Exit PCASE.
2. Locate your current *Vehicles.mdb* file in the EMS Program Files\PCASE\Servers folder.
3. Delete that *Vehicles.mdb* file. Do **NOT** delete the *Vehicles.bak* file. This will preserve your custom vehicles. *If you don't feel comfortable deleting the Vehicles.mdb file, then rename it (e.g. VehiclesOld.mdb) until you ensure that the updated Vehicles.mdb works. Again, do NOT edit the Vehicles.bak file.*
4. Copy the new *Vehicles.mdb* file into the EMS Program Files\PCASE\Servers Folder.

Vehicles added to the database
